

Secure Access Technologies Announces Integration with MobileIron AppConnect

Integration Brings Single Sign-on, Multi-factor Authentication & Proximity Security to MobileIron App Ecosystem

November 05, 2013 10:00 AM Eastern Standard Time

MENLO PARK, Calif.--(BUSINESS WIRE)--Secure Access Technologies (SAT), a leading provider of single sign-on (SSO), multi-factor authentication & proximity security for enterprise mobility and BYOD, today announces that it is part of the MobileIron AppConnect ecosystem. SAT integration with MobileIron AppConnect provides one-click login to enterprise applications on iPads and protects data in real-time when a user smart phone is separated from the iPad. More importantly, IT has the policy controls it needs to secure and manage corporate data.

MobileIron, the leader in security and management for mobile apps, documents, and devices, provides its AppConnect technology to third party mobile app developers. With MobileIron AppConnect apps, companies can give their employees the best third-party application experiences with apps that have been enabled with auto-configuration, data containerization, and secure tunneling to protect corporate data.

The combination of SAT Secure Mobile Desktop with MobileIron AppConnect provides a secure work environment on iPads where employees can access any corporate application without keying passwords. Employees authenticate only once and as long as their phone running the SAT Token application stays in proximity of their iPad, they have one-click access to any authorized application. When their phone separates from the iPad or leaves a trusted location, Secure Mobile Desktop locks automatically, and if left un-attended in a public location, it alarms, calls and auto-wipes data according to policies. SAT also works on Android, Windows, Mac and Web.

"SAT and AppConnect transform any iPad into a more-secure-than-a-workstation device," said Ben Ayed, CEO of SAT. "IT personnel can rest assured that the data is secured 24/7 in real-time, even when there is no connectivity."

The AppConnect program reflects MobileIron's commitment to driving inventive collaboration across the industry and help protect information, identities and infrastructures.

"MobileIron's AppConnect program is focused on giving our customers best of breed apps that make employees more productive," said Ojas Rege, VP Strategy, MobileIron. "The combination of SAT with AppConnect provides breakthrough password-less experience without compromising security."

About MobileIron

The leader in security and management for mobile apps, documents, and devices, MobileIron's mission is to enable organizations around the world to embrace mobility as their primary IT platform in order to transform their businesses and increase their competitiveness. Global companies, including 8 of the top 10 automotive manufacturers, 7 of the top 10 pharmaceutical companies, 5 of the top 10 banks, 5 of the top 10 law firms, and 4 of the top 10 retailers, rely on MobileIron's scalable architecture, rapid innovation, and best practices as the foundation for their Mobile First initiatives.
